

QT SERIES AGITATED HEATED QUENCH TANKS

Model QT1824 with agitation, heater and optional safety lid

Shows lid closed

Model QT 2436

Detail of inside of panel

QT Agitated Heated Quench Tanks provide superior quench results

L&L's QT Series agitated heated quench tanks feature vigorous propeller type agitation (in a separate protected chamber), controlled electric heating, temperature gauge, NEMA 4 oil tight control box, inlet and outlet pipes for external cooling, double welded seams, epoxy coated interior and optional safety lid with fused fire link. These are heavy duty quench systems designed to provide superior quenching in heat treating applications. Explosion proof motors for oil quenching are optional. Pneumatic elevators are optional.
